November 2022

Dear Model Railroader,  
Greetings.

The Lakes Region Model Railroad Museum (LRMRM) of Wolfeboro, New Hampshire, is seeking assistance from experienced model railroaders and/or model train museum experts to provide:

- 1 Professional layout construction; and/or
- 2 Volunteer support

We are asking you to circulate this letter and invitation to your membership to see if anyone is interested in exploring with us this opportunity to make a significant contribution to the hobby and help create an impressive model layout for the public to experience.

In 2022, the LRMRM completed rehabilitating an 1872 B&M freight house located in the center of Wolfeboro and is now moving forward with the design of the layout. Enclosed are the functional specifications that reflect our current thinking about how the museum will tell the story of the early railroad industry in New Hampshire, showcasing the eastern side of Lake Winnepesaukee, with particular emphasis on how the arrival of the railroads converted isolated agricultural villages into busy manufacturing centers and tourist destinations.

The LRMRM intends to convert these functional specifications into technical specifications using modern train controlling software. Please let us know if you are interested in discussing with us either or both of the following:

- 1 Develop and/or provide guidance with respect to interactive model railroad control software programs.
- 2 Build and deliver customized model train layouts.

We look forward to hearing from you at your early convenience and please respond in any event.

Contact us at the address above or at [info@lrmm.org](mailto:info@lrmm.org). Please also visit <https://lrmm.org/design/> for updates to the functional specification, for a conceptual video and for further information about the museum. Thank you.

Sincerely Yours  
John Simms, President

Paul McBride, Vice President
